AFEEZ OPEYEMI OYEWUMI

Data Analyst | Python · SQL · Dashboards · Economic & Policy Analysis

Ikeja, Lagos, Nigeria • Oyewumi1303@gmail.com • +234 814 3343 664 • https://github.com/Sirelamar

Portfolio: https://afeez-portfoli.vercel.app

PROFILE

Data analyst with a certified 9-month Data Analysis programme, a Political Science degree and over three years of client-facing sales experience. Builds end-to-end, reproducible analyses: collecting official data from APIs, cleaning and validating it, running statistical tests, modelling it in SQL and publishing interactive dashboards. Particularly interested in using data to explain economic and policy questions in Nigeria and across Africa, and in turning findings into clear, honest recommendations for decision-makers.

DATA ANALYSIS PROJECTS

Nigeria Import Trends & Economic Dependence (2010–2025) *Python · SQL · Streamlit · Power BI*

Dashboard: https://nigeria-import-trends-economic-dependence-opvvzhhorccahpme5dfd.streamlit.app

GitHub: https://github.com/Sirelamar/nigeria-import-trends-economic-dependence

- Built an automated pipeline that downloads UN Comtrade and World Bank data through their APIs (with retries, caching and SHA-256 provenance), then cleans, validates and reconciles 6,700+ trade records.
- Answered five research questions on what Nigeria imports, from whom, and how the naira relates to import costs, using growth/CAGR, Herfindahl–Hirschman concentration and correlation tests.
- Found that mineral fuels rose from 1.4% to 33.2% of imports, China supplied 29.4% of imports in 2025, and naira depreciation (₦150 → ₦1,518 per US$) showed no statistically significant link to import growth.
- Designed a SQLite database with window-function queries, 12 charts, a 5-page Streamlit dashboard, Power BI-ready star-schema exports and a written research report; covered by 39 automated tests.

Nigeria's Crypto Adoption & Market Dynamics (2018–2026) *Python · Statistics · Plotly · SQL*

Dashboard: https://nigeria-crypto-analysis-jiwjvem9hbx9wwtramxxkc.streamlit.app

GitHub: https://github.com/Sirelamar/nigeria-crypto-analysis

- Combined 3,200+ days of Binance Bitcoin/Ether prices, Central Bank of Nigeria exchange-rate and inflation data, World Bank indicators and Google Trends into one validated, time-zone-aligned dataset.
- Showed that the naira "premium" on Bitcoin (mean 32.9% above the official-rate price) was almost entirely the gap between market and official exchange rates, not extra demand for crypto.
- Measured that after the 2023 FX unification the exchange rate explained ~41% of weekly naira-return variance (up from ~1%), using return decomposition, HAC regressions, unit-root and structural-break tests, and a crash event study.
- Delivered a 6-page interactive Streamlit/Plotly dashboard, 14 charts, a SQLite database with 12 analysis queries and a 15-section report; covered by 58 automated tests.

CERTIFICATION

Data Analysis — Cyconet Cybersecurity Academy · Tech School, Ibadan *Issued 10 September 2026*

9-month programme; awarded on completion of every lesson, examination and assessed project. Verify: https://cyconet.ng/verify/3NT7E4RDXT

WORK EXPERIENCE

Sales Consultant — In-Out Logistics, Lagos *December 2022 – March 2026*

- Identified potential customers, generated leads and converted prospects into active clients for the firm's logistics services.
- Assessed clients' supply-chain requirements and recommended tailored solutions balancing cost, delivery time and service expectations.
- Prepared competitive quotations, negotiated rates and service terms, and closed contracts while protecting profitability.
- Built long-term client relationships, resolved inquiries and complaints, and secured repeat business through consistent service delivery.

- Monitored industry trends, customer demand and competitor offerings to identify new opportunities and adjust sales strategy.

Subject Teacher (NYSC) — Aisegba Community High School, Aisegba, Ekiti *November 2021 – November 2022*

- Planned and taught structured lessons in line with the approved curriculum and learning objectives.
- Set and marked tests, assignments and examinations; recorded student performance and gave constructive feedback.
- Contributed to subject planning, schemes of work and instructional materials; mentored learners and provided extra academic support.

EDUCATION

BSc (Hons) Political Science — University of Ilorin *September 2015 – August 2021*

Secondary School Certificate — Victory International College *August 2011 – July 2015*

SKILLS

Data & analysis: Python (pandas, NumPy, SciPy, statsmodels), SQL (SQLite, window functions), statistical testing and regression, time-series analysis, data cleaning and validation, API data collection

Visualisation & tools: Streamlit, Plotly, Matplotlib, Power BI data modelling, Git & GitHub, Jupyter, automated testing (pytest)

Business: market research, data analysis & reporting, consultative selling, negotiation & contract closing, customer relationship management, lead generation

Professional: communication & presentation, problem-solving & critical thinking, time management & organisation

VOLUNTEER EXPERIENCE

- Chairman, Logistics — University of Ilorin Students' Independent Electoral Commission
- Community road works and bridge construction

REFEREES

Available on request.
